To Whom It May Concern:

I am writing to express my support for the California Transplants Service's application for membership in the Eye Bank Association of America.

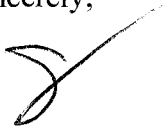

I have received corneal tissue for transplant from the California Transplant Service numerous times over the past several years. The tissue has always been of good quality, making for desirable outcomes in patients utilized this tissue.

CTS has always provided a high level of service. I have received all donor data required in an appropriate and timely manner.

My organization is pleased with the service provided by California Transplant Service and intends to continue our relationship. I know of no reason why the local community would object to services being provided to them through CTS.

I support the application for membership by California Transplant Service, Inc in the Eye Bank Association of America. Should you require any further information or confirmation please contact my office.

Sincerely,

Robert W Snyder MD PhD
